FREQUENTLY ASKED QUESTIONS

When will construction be completed?

The estimated completion date for all of the widening between Loveridge Road and Highway 160 is late 2014. The completion of the eBART extension projects to Antioch will follow the completion of the highway widening projects. Please submit inquiries directly to BART for specific information regarding the eBART extension project to Antioch.

The BART web site is: <http://www.bart.gov/>

How many lanes will there be?

The completed highway will have four (4) through lanes in each direction with one (1) "car pool" lane and three (3) mixed flow lanes. There will also be an auxiliary lane between each of the on/off-ramps.

When will future projects be advertised?

The Contra Loma segment was advertised in July of 2011. The Lone Tree segment is expected to be advertised in November of 2011. The Hillcrest segment is expected to be advertised in 2012.

FREQUENTLY ASKED QUESTIONS

Will there ever be a connector to the Highway 4 bypass from Highway 160?

Eventually there will be a connector to the bypass from Highway 160, but a date for that work has not been determined at this time.

Where do I find information on progress on the projects?

On the home page, click on the "PROJECTS" link and a drop down menu will appear. Click on the project you are interested in and it will take you to that page. There is a link on each of the project pages that leads to upcoming activities. We post approximately once a month on what work has been completed in the past month and what work is anticipated in the coming month.
